

## Every Breastfeed Makes a Difference

*A Breastfeeding project produced by the 2012 intake of BSc Midwifery students In the University of Limerick as part of the "Protecting, supporting and promoting breastfeeding module".*

For Breastfeeding Week 2015, the BSc Midwifery students, and Maria Noonan module leader for the breastfeeding module, invited pregnant women and breastfeeding mothers to the University. The students displayed their project in a public area and received positive feedback.

The students kindly donated the project to the University Maternity Hospital in Limerick. It is on display in the antenatal clinic to educate pregnant women and their families on the value of breastfeeding and that every breastfeed makes a difference. It has received positive comments from service users and visitors to the hospital.

The baby vests increase in size over the time and each vest has a message for that time period.

My poo changes from that black sticky stuff to a greenish brown.  
My digestive system is working great!  
This makes the midwives very happy.
